May Card

this month, I got my ear cartilage pierced! I had to wait because you aren't allowed earring in soccer, so you have to take them out, but it needed to heal, so I would've needed to leave them in.

It hurt a little and before getting pierced was very nerve wracking, but I'm glad I did it.

I have to soak my ear in hot water with salt twice a day until the water

gets cold, I become's long and time consuming, certainly in the morning before school. But I am very happy with it :)

It will take like 6 months to heal, so I'm hoping it will be healed before soccer.

Samantha
