

Hi Bill,

(October letter) Nov 19th

Now I'm not exactly sure what to write about because you wrote me a letter first, which is a first, but ~~that~~ now I don't know what to write about. Lately I have been feeling better.

I think that my research paper and facility visitation project were stressing me out the most. And going home for these couple of weekends and having mom come here really helped me because I had support. And getting help with my paper made me get my awesome grade so I thank you as well. This weekend I am staying home doing homework, because I feel like all my projects are due this coming week.

Love Samantha ♀
